Illustrated Craft Tutorial - How to Make a German Paper Star - "Froebel Stern" - Page 1

This star can also be made with metallic paper strips which adds an elegant touch to it. This tutorial is using 4 different colors of paper to make the steps easier to follow.

[AdChoices](#)

▶ [Learn German](#)

▶ [Origami Paper Craft](#)

▶ [3D Origami Christmas St:](#)

1. Cut 4 strips of paper measuring all measuring 1 x 45 cm or 1.5 cm x 50 cm or 2.5 x 90 cm.

This particular width and length was 1.5 x 50 cm and will make stars measuring approximately 4x4 cm. Fold each strip in half longwise. Cut the ends to a point. That makes the weaving easier in the later steps.

2. Insert each strip within the next in each direction. When correctly done they should pull together and hold each other in place.

3. This is now how the star looks.

4. Fold top left strip down.

5. Fold the bottom left strip to the right.

6. Fold the bottom right strip up.

7. Fold the top right strip left. Insert the end point through the loop under the blue piece. This will lock the strips in place.

8. This is how the piece should look now.
